Acumatica

The Cloud ERP

Proactively Manage Projects and Track All Activities and Documents

Achieve greater success by connecting your people and projects and streamlining your processes.

Just like having the right tools for completing your construction project, you also need software for managing projects effectively. This should include a way to track costs compared to budgets, view and store important documentation (RFIs, job photos and change orders), and collaborate with the field, office, or your client.

Project Managers will enjoy Acumatica Construction Edition's intuitive and easy-to-use project management software that tracks and manages all activities—for drawings, photos, change orders—and all-important documentation that impacts a contract and informs the audit trail. With automatic alerts and mobile access, Project Managers will be proactive and have the information needed – and not leave to chance whether projects are generating or consuming cash.

With Acumatica Construction Edition you'll make decisions more effectively, streamline processes, and have greater success with your projects.

KEY BENEFITS

IMPROVE OPERATIONAL EFFICIECIES

- Streamline processes and eliminate double entry
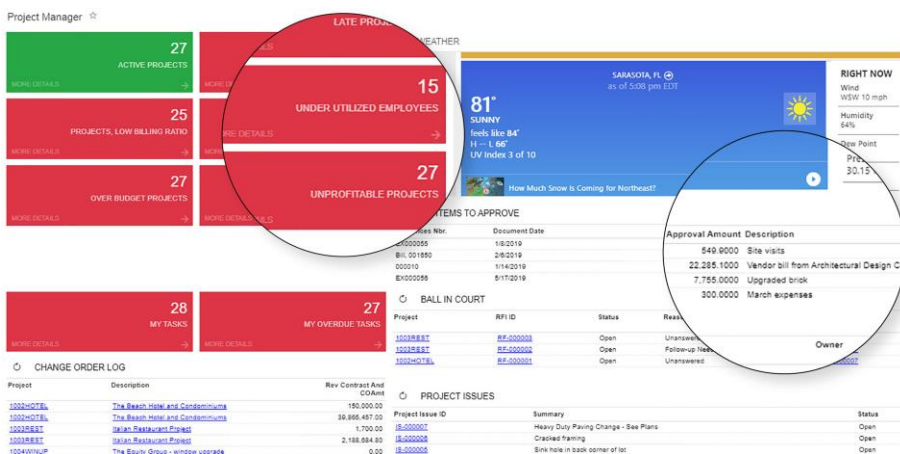

REDUCE PROFIT FADE

- Stay ahead of scope changes and cost impacts

SEAMLESSLY CONNECTS TO ACCOUNTING

- Informed project managers help ensure projects stay profitable

EXPERIENCE PROFITABLE GROWTH

- Unlimited users give your entire workforce software access at no additional cost
- Grow your business without adding to your IT budget
- Get the latest software updates at no additional cost

KEY FEATURES

Job Cost Accounting	Built-in job cost accounting capabilities to track budgets, payroll, invoicing, and billing so you can see your cash flow at-a-glance and give everyone in the field and at the office an up-to-date snapshot of the project.
Dashboard and Reports	Get insights into all open projects with a role-based dashboard, your project managers should be able to access the project information they need to keep the project moving in the right direction.
Document Management	Gain a complete view of your project details—including real-time field updates—providing an instantaneous information flow between your project management team, your back-office workforce, and management. Easily manage and track all daily activities, submittals, issues, changes, project documents, and job costs from one central area.
Daily Field Reports	Ensure project information has been transferred from the field to the office accurately. Daily Field Reports include Time Collection, Subcontractor Updates, Job Site Visitors, Issue and Change Request tracking, along with Job Site weather updates.
Photo Logs	Enable users to manage progress photos taken by field superintendents, or other employees, and associate those with projects and project tasks. These become available for viewing and sharing via a secure online service.
Project Issues	Capture Project Issues from a smart phone or tablet including photos and videos. Issues can be assigned for follow-up and can also be converted to Change Requests as part of a Change Order Workflow process.
Outlook Add-in	Eliminate multiple processes to update project activities with our simple, easy to use Outlook Add-In. This makes communications even easier for Project Managers where emails are added to Project activity, an existing RFI, or Project Issue.
Mobile App	Get anytime, anywhere access. Quickly see key reports on phones and tablets and give field teams the tools to track projects, enter employee expense and time electronically. Access the complete system over any device and search for all project details from one global search box.
